

JOEY HARMON (2009)

1 WHAT DID YOU ENJOY MOST ABOUT YOUR TIME AT EFIP AND WHY?

The diversity it exposed me to at such a young age. The connections and great friends will always be my favorite part.

2 PLEASE DESCRIBE YOUR CURRENT STUDIES/WORK.

I went to the University of the Sciences for my bachelors degree, followed by Johns Hopkins University for my Masters. I have always been focused in the sciences, notably biology and chemistry, with overall interest in health sciences and medicine.

3 HOW DO YOU THINK EFIP PREPARED YOU FOR HIGH SCHOOL AND BEYOND?

I thought EFIP offered me an advanced education that allowed me to adapt to high school very easily. A lot of the initial material I covered in high school was previously covered in EFIP, which made me feel very comfortable in a new atmosphere.

4 WHAT IS YOUR BEST MEMORY OF YOUR STUDENT LIFE AT EFIP?

Our soccer team in middle school.

5 WOULD YOU LIKE TO ADD SOMETHING?

A wonderful school that taught me more than just material from books, EFIP teaches you values and the importance of friends, family and the people around you. I feel very fortunate to have received my education from EFIP.
